

**Supporting All Domains of the Danielson  
Framework for Teaching With  
Educational Technology, Grades K-12**

**January 8, 2019**

---

**Presenter:** Kristine Scharaldi, Education Consultant

<b>Registration</b>	MUJC Members:	\$110.00
<b>Fees:</b>	Nonmembers with subscription:	\$110.00
	Nonmembers:	\$140.00

Join us as we explore how technology can support teachers in all four domains of the Danielson Model for Teacher Evaluation: Planning and Preparation, The Classroom Environment, Instruction, and Professional Responsibilities. Various ways that technology can be utilized throughout the subcomponents of the Danielson Framework will be shared. Specific digital tools, platforms, and applications will be demonstrated and highlighted to assist educators across grade levels, content areas, and teaching situations. Discussions on collecting formative data to differentiate instruction, sharing student work with opportunities for feedback, engaging every learner using digital tools and platforms, and using technology to communicate and collaborate will take place. Hands on time will be provided to learn new technology tools to incorporate immediately into practice.

Participants will gain knowledge and skills in:

1. exploring effective practices that can be supported by technology;
2. learning specific applications, digital tools, and platforms to assist teachers in the four domains of the Danielson Framework;
3. identifying ways that technology can be implemented into professional practice.

**Note:** This inservice is geared for all levels of technology proficiency. Participants are encouraged to bring their own devices and headphones with microphone to be able to fully explore the potential of the technology tools.

All inservices are held from 9 a.m. to 3 p.m. unless otherwise noted.  
Enjoy lunch on your own!
